

## CONTRIBUTORS

JOSEFINA ALVAREZ, Ph.D., is currently a Professor in the Department of Clinical Psychology at the Adler School of Professional Psychology in Chicago, Illinois. She received her M.A. and Ph.D. in Clinical Community Psychology from DePaul University. Her research interests include cultural competence within mental health practices, Latino/Latina mental health, substance abuse treatment, and mutual help programs. She has been involved in and published her substance abuse research for 12 years.

KATE BRERETON, Psy.D., is currently a Psychology Resident at a private practice providing individual therapy and diagnostic testing. The study reported in this issue is based on her dissertation at the Adler School of Professional Psychology from which she received her M.A. and Psy.D. degrees in clinical psychology. She is interested in research on the continuum of care for women with substance use problems, substance abuse treatment, and social justice.

JOHN S. CACCIOLA, Ph.D., is a Senior Scientist at the Treatment Research Institute in Philadelphia and adjunct Professor of Psychology at the Perelman School of Medicine, University of Pennsylvania. Dr. Cacciola received his Master's and Doctoral degrees in Clinical Psychology from Temple University in Philadelphia. His varied and extensive work in addiction has focused on: developing, refining, testing, and disseminating diagnostic and psychosocial assessment instruments to profile problems and strengths of individuals with addiction; identifying individual and service predictors of substance abuse treatment outcomes; and developing and evaluating treatment interventions.

VIDA B. DYSON, Ph.D., is currently a Professor in the Department of Clinical Psychology at the Adler School of Professional Psychology. She received her M.A. and Ph.D. in Psychology/Personality from the University of Chicago. Her research interests include substance abuse assessment, recovery of diverse populations, multicultural assessment and treatment, and child/adolescent mental health, areas in which she has publications.

JOSEPH FERRARI, Ph.D., is a professor of psychology and St. Vincent de Paul Distinguished Professor at DePaul University. He received his M.A. and Ph.D. in Experimental Psychology from Adelphi University. His research interests and publications in community psychology include attitude change and persuasion, community-based service-learning and volunteerism, community building and sense of community, recovery from addiction, health psychology and program evaluation, and behavior analysis in the community. His recent research includes sense of psychological home and religious leaders in community social action and justice.

DIANE MCALLISTER HENDERSON's career interests in psychophysiology, clinical care, and teaching span over four decades. She received her B.A. from College of Notre Dame of Maryland in 1970. Her career activities include Psychophysiological Research Assistant, Substance Abuse Counselor at the Haight Ashbury Free Clinics, teacher and Substance Abuse Intervention Specialist in the San Francisco schools. She returned to research and client-centered care in 2004 as a Research Assistant studying Sober Living Housing with the Alcohol Research Group, Public Health Institute. Diane is currently continuing studies in classical drawing at the Crocker Art Museum in Sacramento, California where she resides.

JASON HOWELL, MBA, is a State of Texas approved Peer Recovery Support Specialist Trainer, and has worked in the addiction recovery field since 2008. His degrees (Bachelor's of Science and a Master in Business) are from Texas A&M University, Howell is a founding Board Member and the current president of the National Alliance for Recovery Residences (NARR) and is the co-founder and Executive Director of SoberHood, a peer-led recovery community organization.

LEONARD JASON, Ph.D., is a professor of psychology at DePaul University and Director of the Center for Community Research. His research interests include chronic fatigue syndrome/Myalgic Encephalomyelitis, Oxford House Recovery Homes, prevention of school violence, smoking and prevention, and media interventions. He has studied recovery residences for over 20 years and has published extensively on this topic including *Rescued lives: The Oxford House approach to substance abuse* with Olson and Foli, published by Routledge in 2008.

BABETTE JEE is a licensed architect who attended the University of California, Berkeley, College of Environmental Design. She is a practicing architect and planner who has been in private practice for the past 30 years and has served as a Planning Commissioner in the City of Berkeley. She specializes in working with non-profit organizations on their affordable housing development projects for homeless, elderly, children, and other special communities. These projects typically incorporate community-based support services and require securing city and state funding and support.

CATHERINE MCNEILLY, Psy.D., is currently an Associate Professor in the Department of Clinical Psychology at the Adler School of Professional

Psychology. She received her M.A. from Northwestern University and Psy.D. in Clinical Psychology from the Adler School of Professional Psychology. She has worked on various federal grants investigating addiction issues in pregnant and parenting women and homeless populations.

AMY A. MERICLE, Ph.D., is a Research Scientist in the Alcohol Research Group at the Public Health Institute in Northern California. The study reported in this issue was completed while she was a Research Scientist at the Treatment Research Institute in Philadelphia, Pennsylvania. Dr. Mericle received her Doctoral degree from the University of Chicago and completed post-doctoral studies in the Department of Psychiatry at the University of California, San Francisco. Dr. Mericle is an addiction health services researcher and investigates gaps in the substance abuse treatment delivery system and innovative approaches to increase access to and improve the quality and availability of care for individuals struggling with addiction.

JENNIFER MILES, BA, attends graduate school at Brandeis University's Heller School for Social Policy and Management in Waltham, MA and is working toward a Ph.D. in Social Policy. Her research interests include recovery support services, financing of substance use treatment services, and the mechanisms for change necessary to move the substance use treatment system into a chronic care model. Previously, Jennifer worked at the Treatment Research Institute in Philadelphia, PA as a research assistant, gaining experience in a variety of methods related to substance use treatment research.

DOUGLAS L. POLCIN, Ed.D., is a Senior Scientist at the Alcohol Research Group in Emeryville, California. He has been the principal investigator of studies on sober living houses since 2003. He is currently conducting a 5-year study funded by the National Institute on Drug Abuse on sober living houses that are members of the Sober Living Network in Los Angeles. The study assesses drug, alcohol, HIV risk, and a variety of other outcomes for sober living residents on parole or probation over a 12-month time period. Dr. Polcin has also investigated other approaches to alcohol and drug problems and the role of social pressure to seek help.

EDWARD STEVENS, Ph.D., is a Research Associate at DePaul University Center for Community Research from which he received his Ph.D. degree in community psychology. He has published several papers on Oxford Houses, social support, and sense of community.

DONALD TROUTMAN, owner of Clean & Sober Transitional Living since 1989, has been a Sober Living entrepreneur for 25+ years. His BS in Business Administration is from California State University, Fresno. After getting clean and sober in July 1985, he attended American River College where he completed 2 years of classes in real estate practices and chemical dependency classes. Through the California Association of Addiction Recovery Resource's (CAARR) he obtained his Chemical Addiction Specialists class I and II, is a Certified Recovery Program Manager (CRPM), and a Sober Living Specialist (SLS).

FRIEDNER D. WITTMAN, Ph.D., M.Arch. is President of CLEW Associates, a private consulting firm, and is an Affiliate Scientist at Alcohol Research Group, Public Health Institute. He has 40 years' experience in planning and research for environmental design and architectural programming for public health and safety. He specializes in community planning to prevent alcohol/drug problems, design and operation of sober housing, and architectural planning and facilities programming for health/mental health and social services.
