

Substituent effect of 7-hydroxy-1-methylquinolinium derivatives: A photochemical approach to development of new fluorescent pH indicator

Naoko Senda, Atsuya Momotake, and Tatsuo Arai

Supporting Information

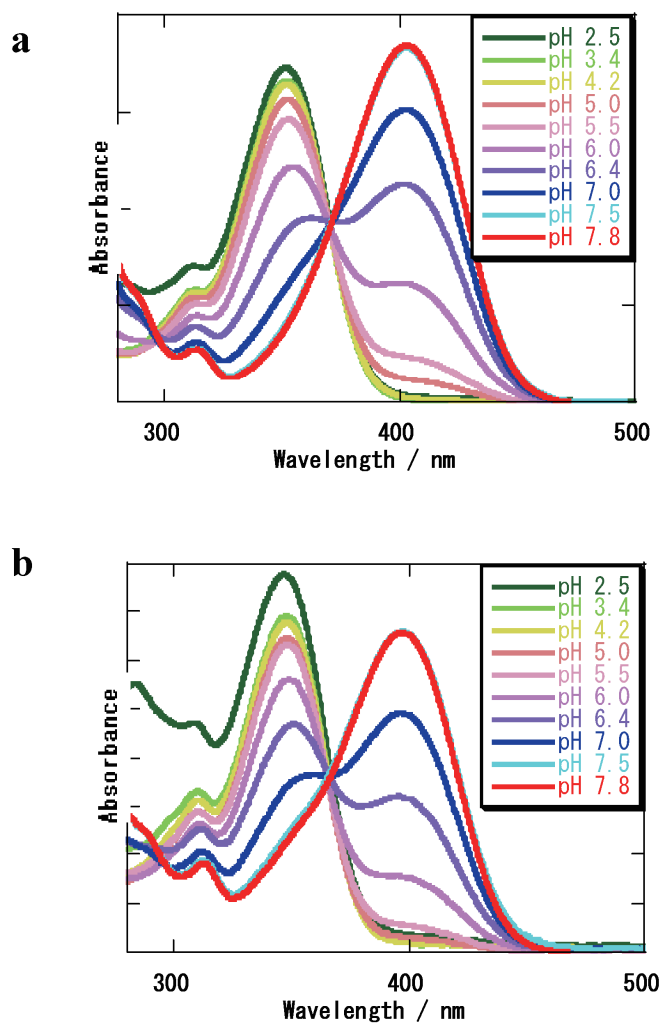

Figure S1. pH Dependence of the absorption spectra of **2** (a) and **3** (b).

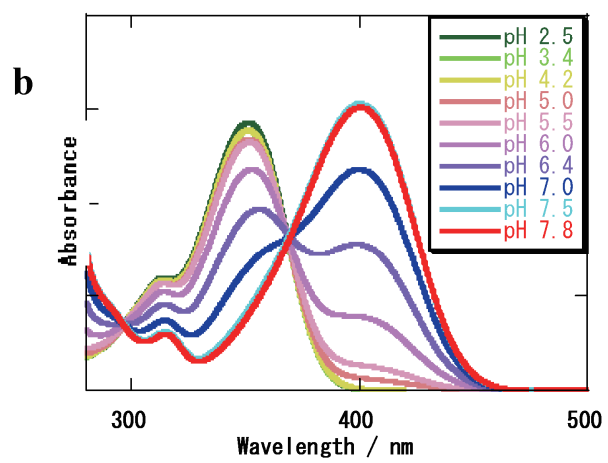

Figure S2. pH Dependence of the excitation spectra of **2** (a) and **3** (b) monitored at 500 nm.
